## **Web Development Experience**

### **Self Teaching Stage**

**Feb. 2018 – Present**

- Strong grasp of JavaScript, HTML, and CSS and their use in application architecture
- Can create full web apps from scratch using React.js to include, styling, routing, HTTP requests, server setup, 3rd party API integration, authorization, and data persisting
- Repetitive use of React, Redux, React Router, Redux Forms, and more in client-side development
- Responsive web design using Sass, media queries, flexbox, grids, and UI libraries
- Ability to structure servers and APIs with Node.js and Express.js including routing, middleware, authentication flow, and database integration/setup
- Repetitive use of Git for source control of projects

### **JavaScript/UI Developer at AASKI Technology**

**Mar. 2016 – Oct. 2016**

- Utilized JavaScript, jQuery, HTML5, and CSS3 on a daily basis
- Performed duties as the only client-side developer in the group, working with a large user interface, originally constructed by a 3rd party development company
- Completely remedied a large backlog of bugs and created multiple new application features
- Built dynamic views that were feature-rich which allowed for the tracking of aircraft position and telemetry on a realtime basis in order to be showcased for new client outreach
- Worked with Backbone.js and Marionette.js frameworks in the view layer.
- Employed React.js to construct R&D views in order to update front-end architecture
- Mapped the entire UI system spanning approx. 180 core JavaScript files

## **Education**

### **Bachelor of Science, NanoEngineering**

**2010 - 2014**

University of California, San Diego

## **Other Occupational Experience**

### **Mortgage Banker at Titan Mutual Lending**

**Oct. 2016 – Feb. 2018**

- On a daily basis, spent hours interacting with clients from all walks of life and with varying personalities
- Consistently diffused and managed problems while assisting clients with one of their biggest financial investments

**Co-Owner of Market Street Lighted Signs (Marketing and Advertising)**

**Apr. 2015 – Aug. 2015**

- Managed business operations
- Delivered marketing pitches to over 60 businesses
- Designed and maintained business website

**Research Associate at nanoComposix**

**Dec. 2013 – Apr. 2015**

- Lead Engineer to bring development idea from initiation phase to new marketable product line
- Earned nanoComposix \$747,888 through completion of deliverables for custom contracts, grants, and standard product items
- Authored 4 standard operating procedures for new methods that I designed

**Avionics Technician in United States Marine Corps**

**2005 - 2010**

- Honorable discharge as a Sergeant (mid-level position)
- As Section Supervisor, managed 6 individuals and the maintenance of several radar systems worth over \$2 million.
- Led the first Marine Corps team to individually site survey, set-up, troubleshoot, and repair a brand new radar system in a combat environment which led to engineering changes and adoption of the system by the USMC
